

5000 Yonge Street

WiredScore fact sheet

Connectivity isn't a nice to have, it's a requirement

That's why 5000 Yonge Street has worked with WiredScore to measure, improve and certify its digital connectivity.

WiredScore is the world's only internationally recognized digital connectivity rating scheme. 5000 Yonge Street has been awarded a WiredScore Gold rating for its outstanding digital connectivity!

WiredScore
GOLD

What does this mean?

Connectivity

Five or more high-speed internet providers are available (fiber or fixed wireless) giving tenants options at a competitive rate.

Fiber connectivity is ready to deliver high-speed internet to tenants.

There is at least one fully distributed fiber option throughout the building to provide tenants with faster installation time and minimum disruption.

There is free Wi-Fi in a common area to provide seamless internet connectivity and to enable guests to connect upon arrival.

There are diverse points of entry on different sides of the building to prevent single points of failure.

There is spare capacity at the building points of entry to enable faster installation times and minimum disruption for new internet service providers.

There is capacity available throughout the riser(s) to enable faster installations of new connectivity services.

There is space available in the telecommunication room(s) to accommodate new internet service providers, enabling faster installation times.

Infrastructure

The space allocated for service provider equipment is secured with access control and dedicated to improve data security and reduce risks of accidental damage.

Access Readiness

There is a standardized access agreement on file to expedite future installations of internet service providers.

Connectivity options

Fiber/Fixed Wireless	Distribution
Bell	Full Distribution
Cogent	Partial Distribution
Rogers	Full Distribution
Telus	Partial Distribution
Zayo (Allstream)	Full Distribution

Coax/Copper	Distribution
Bell	Full Distribution

Additional details

Address

5000 Yonge Street, Toronto
ON, M2N 7E9, Canada

Building Size

542,315 Sqft

Expiration

December 1, 2023

Classification

WiredScore - V3 - Office - Single Building - Occupied

Certification ID

32313

Technical jargon

Fiber

The most technologically advanced form of cabling used in buildings. Direct fiber provides dedicated high speed connections with equal download and upload speeds.

Fiber distribution

Having multiple fibers or tubing installed throughout the building enables quicker installation of connections to tenants.

Wi-Fi coverage

Providing free Wi-Fi in common areas enables tenants and their guests to remain connected throughout the building.

Telecommunication room

A location in the building where service provider equipment is installed. Separation of telecommunication equipment from that of other utilities, such as electricity, gas or water, reduces the risk of internet outages by reducing personnel access to equipment servicing tenants.

Points of entry

These are the telecommunication cable entry points into the building. Having multiple POEs from different locations around the building creates physical separation. Therefore, if the connectivity from one POE is disrupted, connectivity from the other POE can still be functional.

Signed access agreements

Signed access agreement documents indicate that an agreement is in place between the landlord and the ISP that owns cables and equipment in the building. The agreements limit the potential for future conflicts or challenges between landlord and provider that may threaten the ability of tenants to maintain their current or future internet connectivity.

Contact the WiredScore Team for any questions on connectivity or the certification.
