

Smarter, Safer, Healthier Office Buildings

Crown has been working hard behind the scenes so you can return to the workplace with peace of mind.

BREATHE EASY

Crown, in conjunction with HVAC experts, created thoughtfully tailored solutions for each building within our portfolio, to ensure the health, well-being and comfort of building occupants.

SANITIZATION STATIONS

We have placed hand sanitizer stations throughout the common areas of our buildings to help reduce the spread of germs.

OUTDOOR PATIOS

Outdoor terraces and access to green space provide tenants the ability to spend time outside, get fresh air and sunshine throughout the workday.

INCREASED CLEANING

We've increased the frequency of our regular building cleaning schedule and have included heavy disinfection of high-use areas.

SMART SENSORS

We've implemented occupancy sensors throughout our buildings to better understand high traffic areas and use this data to anticipate required cleaning and to help predict the ordering of cleaning supplies.

TOUCHLESS BUILDING ENVIRONMENTS

We have installed touch free entrance doors and common area bathroom fixtures to limit contact on high-frequency surfaces.

REALTIME BUILDING DATA

Crown collects and monitors real-time building data of occupancy, water, energy, and air to ensure our properties are running efficiently and safely for our tenants and visitors.
